

How to set the base/clip

- After having spread the adhesive, insert the clip (base/support) underneath the tiles and along the 4 sides (**fig.1**).
- According with tiles size, set one or more clips on every side of the tile.
- Set the tile and beat it with a rubber mallet (**fig.2**).

How to insert the wedge

- Insert the wedge in the clip (base) slot paying attention not to pass the breakpoint (**fig.3**).
- To facilitate this operation, the use of the special traction-adjustable-pliers is recommended (**fig.4**).

How to remove the support

- Once the adhesive is set (**fig.5**), the protruding part of the support, has to be removed by separating it from the clip/base. This can be done with a rubber mallet or even with feet. Beat parallel to the joint (**fig.6**).

Minimum required joint: 1,5 mm (1/16"). Tile thickness: min 3 mm (1/8"), MAX 12 mm (1/2").
